Unix sect.00001, semester 3

Name: Alexander Vasil
Server-Ip: 51.222.30.172
Team Name: ACEUNIX

~~~~~~

Tasks completed this week so far...

-Bought and created users in the VPS server.
-Changed the root user password.

What we were blocked by...

-One teammate was blocked by getting the right RSA key to be able to add it to the server, was fixed by telling him to give the .pub key instead of his private key.

Biggest challenge?...

-Figuring out how to properly ssh into the server from the command line.

Current state of the project...

-Starting out...
